Product Overview

The **USBM8** is a high performance USB flash drive designed specifically for students of secondary school age.

The funky orange rubberised drive offers password protected storage for all of those homework files, MP3s and images to ensure that at school or at home, those must-have files are easily accessible. It's also really simple to back up the data using the **USBM8** backup utility.

Useful web links and a whole host of built-in applications including a dictionary/thesaurus, email client, MP3 player software/organiser and a diary make this a must-have accessory. Should any of these applications be accidentally deleted they can be re-installed at *www.usbm8.co.uk.*

A user-friendly online registration process stores the user name and school contact details on a secure database, and as a virtual nametag on the product itself. These non-deletable contact details are displayed every time the USBM8 is used and can be used to repatriate a lost **USBM8**, whilst the failsafe password functionality eliminates the risk of personal data getting into the wrong hands.

The product is available in capacities of 256MB, 512MB, and 1GB offering a solution for all budgets and storage needs.
